DETAILED ACTION

1. Applicant's election of claims 16-24 without traverse is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 16-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beidokhti in view of Lin et al.

Beidokhti discloses a light fixture comprising a light cover 27 operatively connected to an annular bracket 21, an elongated body having a longitudinal internal channel 102 having a proximal end and a distal end, a discharge orifice 51 provided adjacent the distal end, a conduit for transporting water under pressure, and the elongated body operatively connected to the conduit adjacent the proximal end and to the annular bracket adjacent the distal end so that water to be discharged is delivered to the orifice from the conduit by the elongated body while the fixture also functions as a light fixture. Beidokhti does not disclose a misting orifice. Lin et al. teach a spray device comprising a misting orifice and a light device (3 and 30) which shines onto a mist emitted from the misting orifice for decorative purposes. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the device of Beidokhti by replacing the discharge orifice with a misting orifice as taught by Lin et al. since Lin et al. teaches that the use of misting nozzles are also used in conjunction

with lighting for decorative purposes. The orifice diameter as recited in claim 18 would have been a matter of design choice since such a modification would have involved a change in the size of a component which is generally recognized as being within the level of ordinary skill in the art and the pressure as recited in claim 19 would have been a matter of user preference depending on the desired spray characteristics. The limitation recited in claim 23 is a statement of intended use since it has been held that a recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus satisfying the claimed structural limitations.
